

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in this Application:

**Listing of Claims:**

1. (Canceled).
2. (Currently amended) A nasal stimulator comprising:

a cylinder comprising a pair of said cylinders, said pair of said cylinders being joined to one another by a curved tongue, each of said cylinders is internally perforated, each of said cylinder-cylinders including a convex widening periphery throughout a in the central portion of its external portion, said widening covering the periphery of said cylinder except at a first portion of said cylinder, a flattened portion at a second in a portion of said cylinder which faces comes into contact with a nasal septum during use;

a peripheral rim on a lower part of said cylinder adapted to serve as a limit where the insertion of the stimulator into the nose should not pass; and

a protruding support extending from said rim adapted to add pressure on the external wall of the nose, both the widening and the protruding support adapted to produce a gripping effect on the nose alar which stimulates the levator muscle.

3. (Canceled).
